

## Are you responsible for an important change?

How will you deliver on the promises that were made? Does it feel like the pressure is intensifying and everyone's eyes are on you? Would it help to have an independent assessment of the most critical risks to your project's success and recommendations for where you should pay most attention?

**That's what Conner Partners can offer.**

### **Conner Partners' Realization Risk Assessment**

We'll conduct an assessment of your initiative using a risk framework derived from more than 35 years of guiding change execution. We will brief your senior team so they understand the risks that most frequently derail important projects. And, we will provide you and your sponsor with a summary identifying your initiative's most critical risks.

### **Guiding Strategy to Reality**

Risk is never absent in a strategic change. The skill is in knowing how much risk is too much. We'll help you better understand your most prominent risks so you can focus your attention and resources where they are needed. We're betting you will quickly recognize the benefit of being prepared to succeed.

**We share your ultimate goal—success for you and your initiative.**

*Strategy executed... Results realized.®*
